OUR PROJECTS

BTS ROLL OUTS

We specialize in solar installations for BTS, interior and exterior work, adhering to IEE wiring regulations and the IEC standards. Our projects span across various locations including Nairobi, Machakos, Makueni, Moyale, Marsabit, Wajir, Mombasa, Kilifi, Meru, Kirinyaga, Nanyuki, Kwale, and Kibwezi, ensuring high-quality installations nationwide.

KPLC POWER CONNECTIONS

As the primary contractor for Rural Electrification and Renewable Energy Corporation (REREC) and a subcontractor for KPLC, we've played a leading role in connecting KPLC power to BTS sites and extending the power grid to rural areas. Our achievements include over 180 installations, ranging from 33kV to 11kV extensions, as well as backup power solutions like generators and batteries to ensure system redundancy.

DATA CENTRES

Powercom Ltd has top-notch technical capacity to design, install, construct and supervise TIER 1- TIER 4 data centres

Our experts stand out and our clients have found us a reliable companion for their data centre needs.

SOLAR POWER INSTALLATIONS

We also do solar installations for BTS as well as interior and exterior works. Control systems have been put in place to ensure that all our installations are strictly in accordance with the requirements of IEE wiring regulations and the IEC.

END 2 END BTS SITE CONSTRUCTION & INSTALLATION

End-to-end BTS site construction involves site selection, permits, civil work, power setup, equipment and antenna installation, testing, and integration. It's vital for network connectivity and coverage expansion. This process requires meticulous planning, compliance with regulations, and thorough testing. Regular maintenance and documentation ensure site reliability and performance. Multiple stakeholders collaborate for a successful deployment.

BTS SITE MAINTENANCE

PowerCom Ltd specializes in site maintenance services tailored to your unique needs. Our experts conduct comprehensive site assessments, devising customized maintenance plans to optimize your facility's performance. We offer 24/7 emergency support, equipment modernization options, and proactive monitoring to prevent issues. Detailed reports and recommendations are provided after each visit, and our commitment to clear communication ensures your satisfaction. Trust PowerCom Ltd for reliable site maintenance solutions that keep your operations running smoothly.
